

Environmental Declaration -Type II Self-declared Environmental Claims

General information

Declaration type	Environmental labels and declarations - Self-declared environmental claims - Type II environmental labelling - compliant with ISO 14021:2016 This document encompasses a range of products with similar material compositions and specifically highlights the product with the greatest weight within that range.		
Owner of this declaration	BELIMO Automation AG Brunnenbachstrasse 1 8340 Hinwil Switzerland		
Description of the organisation	BELIMO Automation AG is a leading global developer, manufacturer, and distributor of field devices, which are crucial in the precise control of heating, ventilation, and air conditioning systems. Our consistent commitment to innovation, reliability, and energy efficiency directly influences system performance and efficiency.		
	Our global headquarters is in Hinwil, Switzerland, and we have a presence in more than 80 countries worldwide. Our focus on providing localised customer support and service underlines our role as a reliable international partner. Our dedication to sustainability and environmental protection is evident in our corporate strategies, daily operations, and especially in our approach to product development.		
Product-related or management system- related certifications	Quality management ISO 9001 Environmental management ISO 14001		

Belimo and the UN Sustainable Development Goals (SDGs)

At Belimo, our product portfolio, business processes, and values are naturally aligned with UN Sustainable Development Goals, focusing on the environment, health and well-being, and society.

Trust, integrity, competence, and responsibility – values that lie at the foundation of environmental, economic, and social sustainability – define our corporate culture. As an employer, we support personal commitment, teamwork, cultural diversity, and the courage to take risks to inspire customers. We have designed and optimised our product portfolio to maximise energy efficiency and longevity. One hundred percent of our sales align with the UN Sustainable Development Goals.

Our overall sustainability mission is to promote global sustainability by creating healthier indoor environments that consume less energy.

Health and well-being Belimo products offer improved indoor air quality, promoting the health, comfort, and wellbeing of building occupants and enabling critical applications. Our intelligent HVAC components control the major factors affecting room climate and assure a stable and healthy environment (SDG 3).

Environment Our products save energy and reduce CO2 emissions. Moreover, they increase the energy efficiency of buildings (SDG 7) and contribute to their resilience (SDG 9), while making our cities safer and more sustainable (SDG 11). Through our activities, we contribute to doubling the global rate of improvement in energy efficiency, creating measurable sustainability benefits, and strengthening resilience and adaptive capacity to climate-related disasters (SDG 13).

Belimo and the UN Sustainable Development Goals (SDGs)

Society As an employer, we continuously create excellent jobs that emphasise personal commitment, engagement, growth, teamwork, and cultural diversity (SDG 8). We uphold sustainable procurement practices and localised sourcing, minimising waste, and optimising logistics through modularising our product ranges and applying environmental management standards at our central production sites (SDG 12).

Product information						
	Chemical disclosure	RoHS EU Directive 2011/65/EU (RoHS)				
		This product complies with the EU Directive 2011/65/EU (RoHS), which restricts the use of specific hazardous materials in electrical and electronic equipment.				
		REACH 1907/2006 (EC Regulation REACH)				
		This product complies with the provisions of EC Regulation No 1907/2006, also known as REACH (Registration, Evaluation, Authorisation, and Restriction of Chemicals).				
Recycling and end-of-lif	fe information					
	Recycling quota 98.42 %					
		The recycling quota (metal material proportion) is calculated using the following formula:				
		Recycling quota = 100) x Metal weight / Tot	al weight		
	Recycling rate	100 %				
		For calculating the recycling rate (metal and plastic material proportion), the following formula is used:				
		Recycling rate = 100 x (Metal weight + Plastic material weight) / Total weight			tal weight	
	Disposal	Product				
		Devices belonging to and should not be dis Local and applicable	posed of with regula		sed of after their life cycle

Basic embodied carbon calculation

Calculation methodology	The embodied carbon calculation herein follows the 'Basic' methodology outlined in TM65 by the Chartered Institution of Building Services Engineers (CIBSE). This approach relies on data pertaining to the product's material composition to compute embodied carbon for both the A1 (Material Extraction) Scale-up and buffer factors are employed to account for additional life cycle stages such as A2 (Transport to Factory), A3 (Manufacturing), A4 (Transport to Site), C2 (Transport to Waste Processing), C3 (Waste Processing), and C4 (Disposal).				
Product life service	15 years				
Product complexity	Category 2 (CIBSE TM65 Table 4.3)				
Embodied carbon results [kgCO ₂ e]	A1: Material extraction (components that are replaced in B3)	e 8.41 kgCO₂e			
	A1: Material extraction (original product)	84.13 kgCO ₂ e			
	A1–A4, B3, C2–C4: Total embodied carbon wi scale-up and buffer factors	ith 168.43 kgCO₂e			
Assumptions		CIBSE TM65, Table 2.1 CIBSE TM65, Table 2.1
