

Potable water valve, 2-way, Internal thread

- For potable water applications
- NSF/ANSI 372 Lead Free
- NSF/ANSI 61 CLD 23 Water Quality

Technical data

Functional data	Valve size [mm]	1.25" [32]	
	Potable water certificate	NSF/ANSI 61	
		NSF/ANSI 372	
	Fluid	Potable water	
	Fluid temperature	-4212°F [-20100°C]	
	Body Pressure Rating	600 psi CWP	
	Close-off pressure Δps	200 psi	
	Differential pressure Δpmax	25psi	
	Leakage rate	0%	
	Angle of rotation	90°	
	Pipe connection	Internal thread	
		NPT (female)	
	Installation orientation	upright to horizontal (in relation to the stem)	
	Servicing	maintenance-free	
	Flow Pattern	2-way	
	Cv	92	
Materials	Valve body	Lead free brass	
	Stem	Lead free brass	
	Seat	PTFE	
	O-ring	EPDM	
	Ball	Chrome plated lead free brass	
Suitable actuators	Non Fail-Safe	ARB(X)	
	Electrical fail-safe	AFRB(X)	

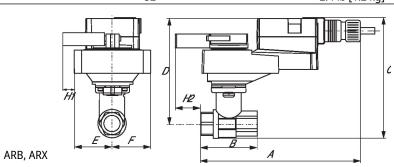

Safety notes

- The ball valve has to be exercised at least once a week, so that the quality of potable water as well as the functionality are not affected.
- The valve has been designed for use in stationary potable water systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- The valve does not contain any parts that can be replaced or repaired by the user.

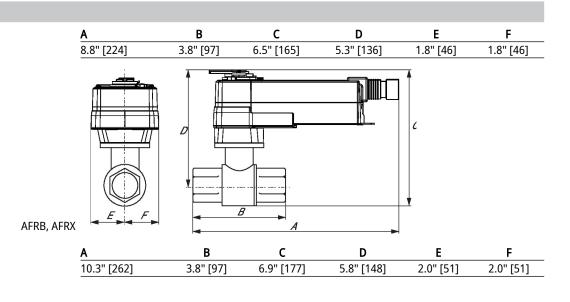

Product features		
Operating mode		a rotary actuator. The rotary actuator is connected by an ounterclockwise and close it clockwise.
Installation notes		
Notes		e. To fulfil this control task in the long term, the circuit mu .g. welding beads during installation work).
Permissible installation orientation	The ball valve can be installed upright to horizontal. The ball valve may not be installed in a hanging position, i.e. with the stem pointing downwards.	
	90° 90°	
Servicing	Ball valves and rotary actuators are	
	rotary actuator from the power sup pumps in the part of the piping sys	trol element is carried out, it is essential to isolate the oply (by unplugging the electrical cable if necessary). Any tem concerned must also be switched off and the ow all components to cool down first if necessary and to ambient pressure level).
	-	o service until the ball valve and the rotary actuator have ordance with the instructions and the pipeline has been ersonnel.
Flow direction	Please also ensure that the ball is ir	n the correct position (marking on the shaft).

 INSTALLATION NOTES Provide overload protection and disconnect as required. Actuators may be connected in parallel. Power consumption and input impedance must be observed. Actuators may also be powered by DC 24 V. Actuators Hot wire must be connected to the control board common. Only connect common to neg. (-) leg of control circuits. Terminal models (-T) have no-feedback. Actuators with plenum cable do not have numbers; use color codes instead. One built-in auxiliary switch (1x SPDT), for end position indication, interlock control, fan startup etc. Apply only AC line voltage or only UL-Class 2 voltage to the terminals of auxiliary switches. Mixed or combined operation of line voltage/safety extra low voltage is not allowed. Meets cULus requirements without the need of an electrical ground connection. Warning! Live electrical components! During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
