### **Electrical installation**

## **X** INSTALLATION NOTES

🚹 Provide overload protection and disconnect as required.

Actuators may also be powered by DC 24 V.

Actuators Hot wire must be connected to the control board common. Only connect common to neg. (-) leg of control circuits. Terminal models (-T) have no-feedback.

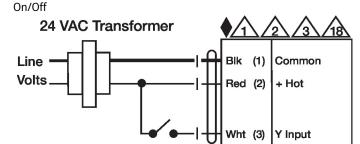

Actuators with plenum cable do not have numbers; use color codes instead.

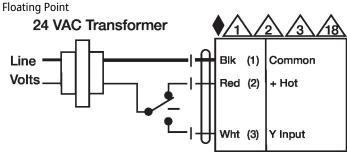

Meets cULus requirements without the need of an electrical ground connection.

## Marning! Live electrical components!

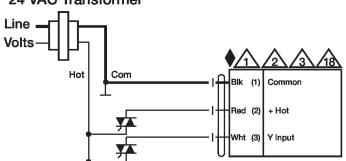

During installation, testing, servicing and troubleshooting of this product, it may be necessary to work with live electrical components. Have a qualified licensed electrician or other individual who has been properly trained in handling live electrical components perform these tasks. Failure to follow all electrical safety precautions when exposed to live electrical components could result in death or serious injury.
