

Spring-return actuator for fire and smoke dampers 90° in ventilation and air-conditioning systems, with connecting plugs for simple integration in control and monitoring systems or bus networks via communication and power supply units

- Torque 4 Nm / 3 Nm
- Nominal voltage AC/DC 24 V
- Control Open/close
- Mechanical interface Form fit 12x12 mm, continuous hollow shaft

Technical data

Electrical data	Nominal voltage	AC/DC 24 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.2...28.8 V / DC 21.6...28.8 V
	Power consumption in operation	2.5 W
	Power consumption in rest position	0.7 W
	Power consumption for wire sizing	4 VA
	Power consumption for wire sizing note	Imax 8.3 A @ 5 ms
	Auxiliary switch	2x SPDT
	Switching capacity auxiliary switch	1 mA...3 A (0.5 A inductive), DC 5 V...AC 250 V
	Switching points auxiliary switch	5° / 80°
	Connection supply / control	Cable with connector plug 1 m, 2x 0.75 mm ² (halogen-free)
	Connection auxiliary switch	Cable with connector plug 1 m, 6x 0.75 mm ² (halogen-free)
	Functional data	Connection plug
Torque motor		4 Nm
Torque fail-safe		3 Nm
Direction of motion motor		selectable by mounting L/R
Manual override		with position stop
Angle of rotation		Max. 95°
Running time motor		<60 s / 90°
Running time fail-safe		20 s @ -10...55°C / <60 s @ -30...-10°C
Sound power level, motor		43 dB(A)
Sound power level, fail-safe		62 dB(A)
Mechanical interface		Form fit 12x12 mm, continuous hollow shaft
Position indication	Mechanical, with pointer	
Service life	Min. 60'000 safety positions	
Safety data	Protection class IEC/EN	III, Safety Extra-Low Voltage (SELV)
	Protection class auxiliary switch IEC/EN	II, reinforced insulation
	Degree of protection IEC/EN	IP54 IP protection in all mounting orientations
	EMC	CE according to 2014/30/EU

Technical data

Safety data	Low voltage directive	CE according to 2014/35/EU
	Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14
	Type of action	Type 1.AA.B
	Rated impulse voltage supply / control	0.8 kV
	Pollution degree	3
	Ambient humidity	Max. 95% RH, non-condensing
	Ambient temperature normal operation	-30...55°C [-22...131°F]
	Ambient temperature safety operation	The safety position will be attained up to max. 75°C [167°F]
	Storage temperature	-40...80°C [-40...176°F]
	Servicing	maintenance-free
Weight	Weight	1.1 kg

Safety notes

- The device must not be used outside the specified field of application, especially not in aircraft or in any other airborne means of transport.
- The actuator is adapted and installed on the fire and smoke damper by the damper manufacturer. For this reason, the actuator is only supplied directly to safety damper manufacturers. The manufacturer then bears full responsibility for the proper functioning of the damper.
- The two switches integrated in the actuator are to be operated either on mains voltage or on safety extra-low voltage. The combination mains voltage/safety extra-low voltage is not permitted.
- Cables must not be removed from the device.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.

Product features

Operating mode	The actuator moves the damper to the operating position at the same time as tensioning the return spring. The damper is turned back to the safety position by spring energy when the supply voltage is interrupted.
Safety Position Lock™	The Safety Position Lock™ reliably holds the fire damper in the safety position in case of fire therefore ensuring maximum safety. The technical solution for this function of the BFL and BFN actuators has a patent pending.
Manual override	Without power supply, the actuator can be operated manually and fixed in any required position. It can be unlocked manually or automatically by applying the supply voltage.
Signalling	Two microswitches with fixed settings are installed in the actuator for indicating the damper end positions. The electrical contacts of these microswitches are equipped with a gold/silver coating that permits integration both in circuits with low currents (mA range) and in ones with larger-sized currents (A range) in accordance with the specifications in the data sheet. It should be noted with this application however that the contacts can no longer be used in the milliampere range after larger currents have been applied to them, even if this has taken place only once. The position of the damper blade can be read off on a mechanical position indication.

Product features

Standards / Regulations The design of the actuator is based on the specific requirements from the European standards:

- EN 15650 Ventilation for buildings – Fire dampers
- EN 1366-2 Fire resistance tests on service installations
(Part 2: Fire dampers)
- EN 13501-3 Fire classification of construction products and building elements
(Part 3: Classification using data from fire resistance tests on products and elements used in building service installations: fire resisting ducts and fire dampers)

Recommendation for application The regular operational check (open/close control of the fire damper) enhances the safety of people, animals, property and the environment. Unless other requirements are stipulated – e.g. in the damper manufacturer's operating instructions – Belimo recommends the performance of a monthly operational check. Fire damper actuators from Belimo are designed in accordance with service life specifications contained in the technical data sheet for regular operational checks. Notes for regular operational checks can be found in the European Product Standard for Fire Dampers (EN 15650) under "Maintenance information".

Connection The actuator is equipped with connection plugs. This allows it to be integrated into control and monitoring systems (e.g. SBS-Control) or bus networks (e.g. MP-Bus solutions) via communication and power supply units (see "Accessories").

Parts included

Hand crank
 Pointer
 Protective bag
 Form fit insert 12/10 mm

Accessories

Electrical accessories	Description	Type
	Communication and power supply unit for fire damper actuators 24 V with connector	BKN230-24-MOD
	Communication and power supply unit for fire damper actuators, Control by pulse release	BSIA24-48
	Communication and power supply unit for fire damper actuators, Control by interrupt release	BSIA24-48-R
	Auxiliary switch 2x SPDT	SN2-C7
Mechanical accessories	Description	Type
	Bracket for SN2-C7 for BFN/BFL, BEN/BEE	ZSN-B
	Pointer 12x12 mm	ZZN12-B
	Hand crank 40 mm	ZKN1-B
	Hand crank 63 mm	ZKN2-B
	Form fit insert 12/8 mm	ZA8-B
	Form fit insert 12/10 mm	ZA10-B
	Form fit insert 12/10 mm without cams, Multipack 100 pcs.	ZA12ON-B.1
	Form fit insert 12/11 mm	ZA11-B
	Protective bag with wire, Multipack 100 pcs.	ZSD-B.1

Electrical installation

Supply from isolating transformer.

Parallel connection of other actuators possible. Observe the performance data.

Combination of mains voltage and safety extra-low voltage not permitted at the two auxiliary switches.

Wire colours:

- 1 = black
- 2 = red
- S1 = violet
- S2 = red
- S3 = white
- S4 = orange
- S5 = pink
- S6 = grey

Additional info:

Plug connection to communication and power supply units: Application examples for integration into monitoring and control systems or into bus networks can be found in the documentation of the connected communication and power supply unit (see "Accessories").

Connection by means of plug at communication and power supply units
