

Globe valve, 3-way, Flange, PN 16

For closed chilled and hot water systems
For modulating control of air-handling and heating systems on the water side

Picture may differ from product

Type overview

Туре	DN	Kvs [m³/h]	Stroke	PN	Sv min.
H7200W630-S7	200	630	65 mm	16	30
H7250W1000-S7	250	1000	65 mm	16	30

Technical data

Functional data	Fluid	Chilled and hot water, water with glycol up to max. 50% vol.					
	Fluid temperature	-10120°C [14248°F]					
	Fluid temperature note	At a fluid temperature of -102°C, a spindle heating is needed.					
	Flow characteristic	Control path A – AB: linear (VDI/VDE 2173), Bypass B – AB: linear (VDI/VDE 2173)					
	Leakage rate	Control path A – AB: max. 0.05% of the Kvs value; Bypass B – AB: max. 1% of the Kvs value					
	Closing point	Top (🔺)					
	Pipe connection	Flange according to ISO 7005-2					
	Installation orientation	upright to horizontal (in relation to the stem)					
	Servicing	maintenance-free					
Materials	Valve body	EN-GJL-250 (GG 25)					
Materials	Body finish	with protective paint					
	Closing element	Stainless steel					
	Spindle	Stainless steel					
	Spindle seal	EPDM					
	Seat	Stainless steel					

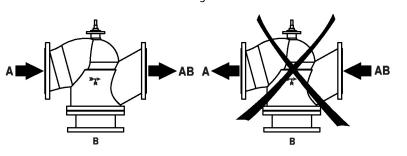

Safety notes					
Â	 The valve has been designed for use in stationary heating, versive systems and must not be used outside the specified field of a or in any other airborne means of transport. Only authorised specialists may carry out installation. All apprinstallation regulations must be complied with during installation. The valve does not contain any parts that can be replaced or The valve may not be disposed of as household refuse. All loc requirements must be observed. When determining the flow rate characteristic of controlled or directives must be observed. 	application, especially in aircraft licable legal or institutional ation. repaired by the user. cally valid regulations and			
Product features					
Operating mode	The large globe valve is adjusted by a long stroke actuator. The commercially available modulating or 3-point control system a acts as a mixing device, to the opening position dictated by the	nd move the valve cone, which			
Flow characteristic	A linear flow characteristic is produced in the direction of flow by the profile of the valve cone The bypass exhibits a linear characteristic curve.				
Fluid velocity	Standard values for low-noise operation in HVAC systems are f fluid velocities above 2 m/s, further flow effects like noise as w can reduce the service life of a valve depending on the situatio	ell as cavitation can occur. This

Installation notes

The direction of flow, specified by an arrow on the housing, is to be complied with, since Flow direction otherwise the valve could become damaged.

Differential and close-off pressure

The maximum differential and close-off pressure of globe valves depends on the mounted globe valve actuator. To ensure optimum operation and maximum service life, the maximum differential and close-off pressure in the table below must not be exceeded.

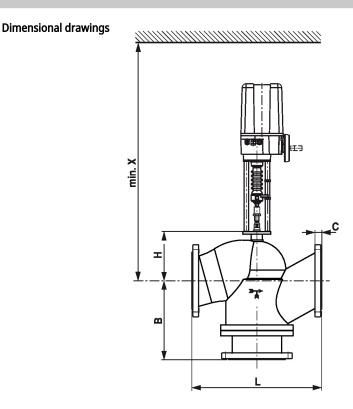

ps<1600 kPa (t= 5 120°C	GV12 15000 N			
	DN	∆p _s [kPa]	∆p _{max} [kPa]	
H7200W630-S7	200	420	250	
H7250W1000-S7	250	270	250	

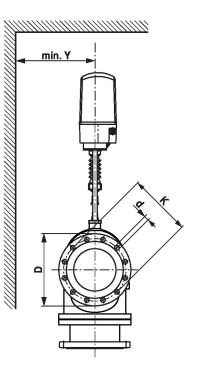

General notes

Delivery notes

Large globe valve and long stroke actuator are supplied pre-mounted. These valves are fabricated only when orders are received.

Dimensions

Dimensions

Technical data sheet

X/Y: Minimum distance with respect to the valve centre. The actuator dimensions can be found on the respective actuator data sheet.

Туре	DN	L [mm]	B [mm]	Н [mm]	C [mm]	D [mm]	d [mm]	K [mm]	X [mm]	Y [mm]	O kg
