

Communicative damper actuator for adjusting dampers in technical building installations

- Air damper size up to approx. 2 m²
- Torque motor 10 Nm
- Nominal voltage AC/DC 24 V
- Control modulating, communicative
- Running time motor 35 s
- Communication via Belimo MP-Bus
- Conversion of sensor signals
- PWIS/LABS-compliant according to VDMA 24364

Technical data

Electrical data	Nominal voltage	AC/DC 24 V			
	Nominal voltage frequency	50/60 Hz			
	Nominal voltage range	AC 19.228.8 V / DC 21.628.8 V			
	Power consumption in operation	4 W			
	Power consumption in rest position	1.5 W			
	Power consumption for wire sizing	7 VA			
	Connection supply / control	Cable 1 m, 4x 0.75 mm ²			
	Parallel operation	Yes (note the performance data)			
Data bus communication	Communicative control	MP-Bus			
	Number of nodes	MP-Bus max. 8			
Functional data	Torque motor	10 Nm			
	Torque variable	25%, 50%, 75% reduced			
	Operating range Y	210 V			
	Input impedance	100 kΩ			
	Operating range Y variable	Start point 0.530 V			
		End point 2.532 V			
	Operating modes optional	Open/close			
		3-point (AC only)			
	Position feedback U	Modulating (DC 032 V) 210 V			
	Position feedback U note	Max. 0.5 mA			
	Position feedback U variable	Start point 0.58 V			
	Position reedback o variable	End point 0.56 V			
	Position accuracy	±5%			
	Direction of motion motor	selectable with switch 0/1			
	Direction of motion variable	electronically reversible			
	Direction of motion note	Y = 0 V: At switch position 0 (ccw rotation) / 1 (cw rotation)			
	Manual override	with push-button, can be locked			
	Angle of rotation	Max. 95°			
	Angle of rotation note	can be limited on both sides with adjustable mechanical end stops			
	Running time motor	35 s / 90°			
	Running time motor variable	2075 s			
	Sound power level, motor	45 dB(A)			
	Adaptation setting range	manual			

Tec	hni	ical	ا ا	ats
		иа	шо	<i>a</i> <i>c</i>

Functional data	Adaptation setting range variable	No action Adaptation when switched on Adaptation after pushing the manual override button			
	Override control	MAX (maximum position) = 100% MIN (minimum position) = 0% ZS (intermediate position, AC only) = 50%			
	Override control variable	MAX = (MIN + 32%)100% MIN = 0%(MAX - 32%) ZS = MINMAX			
	Mechanical interface	Universal shaft clamp 826.7 mm			
	Position indication	Mechanical, pluggable			
Safety data	Protection class IEC/EN	III, Safety Extra-Low Voltage (SELV)			
	Power source UL	Class 2 Supply			
	Degree of protection IEC/EN	IP54			
	Degree of protection NEMA/UL	NEMA 2			
	Enclosure	UL Enclosure Type 2			
	EMC	CE according to 2014/30/EU			
	Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14			
	UL Approval	cULus according to UL60730-1A, UL60730-2-14 and CAN/CSA E60730-1 The UL marking on the actuator depends on the production site, the device is UL-compliant in any case			
	PWIS/LABS-conformity	According to VDMA 24364 (test class C1) Approved for use in zone II Cleaning with low-pressure plasma treatment			
	Hygiene test	According to VDI 6022 Part 1 / SWKI VA 104-01, cleanable and disinfectable, low emission			
	Type of action	Type 1			
	Rated impulse voltage supply / control	0.8 kV			
	Pollution degree	3			
	Ambient humidity	Max. 95% RH, non-condensing			
	Ambient temperature	-3050°C [-22122°F]			
	Storage temperature	-1040°C [14104°F]			
	Servicing	maintenance-free			
Weight	Weight	0.79 kg			

Safety notes

- This device has been designed for use in stationary heating, ventilation and air-conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- Outdoor application: only possible in case that no (sea) water, snow, ice, insolation or aggressive gases interfere directly with the device and that it is ensured that the ambient conditions remain within the thresholds according to the data sheet at any time.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied with during installation.
- The device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- · Cables must not be removed from the device.
- To calculate the torque required, the specifications supplied by the damper manufacturers concerning the cross-section and the design, as well as the installation situation and the ventilation conditions must be observed.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.
- PWIS/LABS-conformity is guaranteed as long as the packaging is unopened. Once the PWIS/ LABS-compliant packaging has been opened, the proper handling of the products is the responsibility of the customer. PWIS/LABS-conformity of unopened products is guaranteed for a period of one year after cleaning, provided they are handled properly, professionally and cleanly. Proof of proper, professional and clean handling is the responsibility of the purchaser. Ensure that the required cleanliness of the products is maintained. Do not touch the products with bare hands. Belimo accepts no liability for the consequences resulting from the contamination of a product caused by the customer.

Product features

Operating mode

Conventional operation:

The actuator is connected with a standard control signal of 0...10 V and drives to the position defined by the control signal. The measuring voltage U serves for the electrical display of the actuator position 0.5...100% and as control signal for other actuators.

Operation on Bus:

The actuator receives its digital control signal from the higher level controller via the MP-Bus and drives to the position defined. Connection U serves as communication interface and does not supply an analogue measuring voltage.

Converter for sensors

Connection option for a sensor (passive or active sensor or switching contact). The MP actuator serves as an analogue/digital converter for the transmission of the sensor signal via MP-Bus to the higher level system.

Parametrisable actuators

The factory settings cover the most common applications. Single parameters can be modified with the Belimo service tools MFT-P or ZTH EU.

Simple direct mounting

Simple direct mounting on the damper shaft with a universal shaft clamp, supplied with an anti-rotation device to prevent the actuator from rotating.

Manual override

Manual override with push-button possible (the gear train is disengaged for as long as the button is pressed or remains locked).

Adjustable angle of rotation

Adjustable angle of rotation with mechanical end stops.

Home position

The first time the supply voltage is switched on, i.e. at the time of commissioning, the actuator carries out a synchronisation. The synchronisation is in the home position (0%).

The actuator then moves into the position defined by the control signal.

Product features

Adaptation and synchronisation

An adaptation can be triggered manually by pressing the "Adaptation" button or with the PCTool. Both mechanical end stops are detected during the adaptation (entire setting range).

Automatic synchronisation after pressing the manual override button is configured. The synchronisation is in the home position (0%).

The actuator then moves into the position defined by the control signal.

A range of settings can be adapted using the PC-Tool (see MFT-P documentation)

Override control with AC 24 V with rotary switch

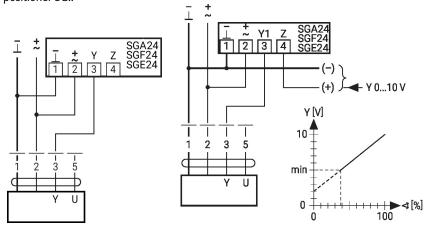

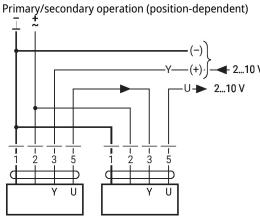

Functions with basic values (conventional mode)

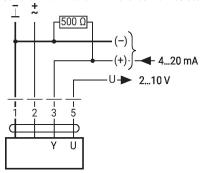

Control remotely 0...100% with positioner SG..

Minimum limit with positioner SG..

Control with 4...20 mA via external resistor

Caution:

The operating range must be set to DC 2...10 V.

The 500 Ohm resistor converts the 4...20 mA current signal to a voltage signal DC 2...10 V.

Functions with basic values (conventional mode)

Functional check

Procedure

- 1. Connect 24 V to connections 1 and 2
- 2. Disconnect connection 3:
- With direction of rotation 0:

Actuator rotates to the left

- With direction of rotation 1:

Actuator rotates to the right

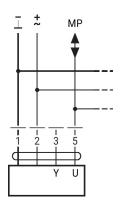

3. Short-circuit connections 2

and 3:

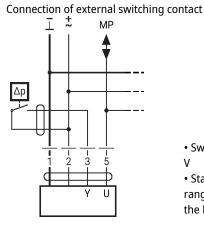

- Actuator runs in opposite direction

Functions with specific parameters (Parametrisation necessary)

Connection on the MP-Bus

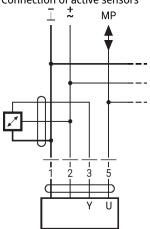

Max. 8 MP-Bus nodes

- Switching current 16 mA @ 24
- Start point of the operating range must be parametrised on the MP actuator as ≥0.5 V

Connection of active sensors

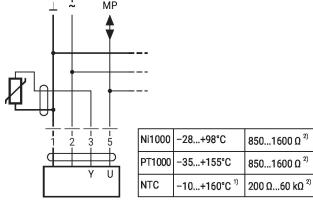

- Supply AC/DC 24 V
- Output signal 0...10 V (max. 0...32 V)
- Resolution 30 mV

Further electrical installations

Functions with specific parameters (Parametrisation necessary)

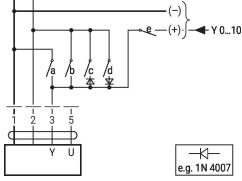

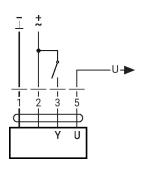

- 1) Depending on the type
- 2) Resolution 1 Ohm Compensation of the measured value is recommended

Override control and limiting with AC 24 V with relay contacts
