

Communicative damper actuator fail-safe and extended functionalities in the IP66/67 protective housing for adjusting dampers in HVAC plants, comparable industrial plants and technical building installations

- Torque motor 160 Nm
- Nominal voltage AC 24...240 V / DC 24...125 V
- Control modulating, communicative, hybrid
- With 2 integrated auxiliary switches
- Conversion of sensor signals
- Communication via BACnet MS/TP, Modbus RTU, Belimo-MP-Bus or conventional control

Picture may differ from product

Technical data

Electrical data	Nominal voltage	AC 24...240 V / DC 24...125 V
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.2...264 V / DC 19.2...137.5 V
	Power consumption in operation	52 W
	Power consumption in rest position	6 W
	Power consumption for wire sizing	with 24 V 54 VA / with 240 V 68 VA
	Power consumption for wire sizing note	Imax 20 A @ 5 ms
	Auxiliary switch	2x SPDT, 1x 10° / 1x 0...90°
	Switching capacity auxiliary switch	1 mA...3 A (0.5 A inductive), DC 5 V...AC 250 V
	Connection protective earth	earth terminal
	Connection supply	Terminals 2.5 mm ²
	Connection control	Terminals 1.5 mm ²
	Connection auxiliary switch	Terminals 2.5 mm ²
	Parallel operation	Yes (note the performance data)
Data bus communication	Communicative control	BACnet MS/TP Modbus RTU MP-Bus
	Number of nodes	BACnet / Modbus see interface description MP-Bus max. 8
Functional data	Torque motor	160 Nm
	Inhibiting torque static (voltage-free)	50 Nm
	Operating range Y	2...10 V
	Input impedance	100 kΩ
	Operating range Y variable	0.5...10 V 4...20 mA
	Position feedback U	2...10 V
	Position feedback U note	Max. 0.5 mA
	Position feedback U variable	0.5...10 V
	Setting fail-safe position	0...100%, adjustable with Belimo Assistant App (default setting 0%)
	Bridging time (PF)	2 s
	Bridging time (PF) variable	0...10 s
	Position accuracy	±5%
	Direction of motion motor	electronically reversible
	Manual override	hand lever

Technical data

Functional data	Angle of rotation	Max. 95°
	Angle of rotation note	can be electronically limited on both sides with Belimo Assistant 2
	Running time motor	35 s / 90°
	Running time motor variable	30...120 s
	Running time fail-safe	30 s / 90°
	Sound power level, motor	68 dB(A)
	Sound power level, fail-safe	68 dB(A)
	Mechanical interface	Form fit 17x17 mm
	Position indication	Scale plate 0...90
Safety data	Protection class IEC/EN	I, protective earth (PE)
	Protection class UL	I, protective earth (PE)
	Degree of protection IEC/EN	IP66/67
	Degree of protection NEMA/UL	NEMA 4X
	Housing	UL Enclosure Type 4X
	EMC	CE according to 2014/30/EU
	Low voltage directive	CE according to 2014/35/EU
	Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14
	UL Approval	cULus according to UL60730-1A, UL60730-2-14 and CAN/CSA E60730-1 The UL marking on the actuator depends on the production site, the device is UL-compliant in any case
	Type of action	Type 1.AA
	Rated impulse voltage supply	4 kV
	Rated impulse voltage control	0.8 kV
	Rated impulse voltage auxiliary switch	2.5 kV
	Pollution degree	3
	Ambient humidity	Max. 100% RH
	Ambient temperature	-30...50°C [-22...122°F]
	Storage temperature	-40...80°C [-40...176°F]
Servicing	maintenance-free	
Weight	Weight	6.6 kg
Terms	Abbreviations	POP = Power off position / fail-safe position PF = Power fail delay time / bridging time

Safety notes

- This device has been designed for use in stationary heating, ventilation and air-conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied with during installation.
- Caution: Mains voltage!
- The device has a protective earthing. Incorrect connection of the protective earth can lead to hazards due to electrical shock.
- Apart from the wiring compartment, the device may only be opened at the manufacturer's site. It does not contain any parts that can be replaced or repaired by the user.
- The device contains electrical and electronic components and must not be disposed of as household refuse. All locally valid regulations and requirements must be observed.
- To calculate the torque required, the specifications supplied by the damper manufacturers concerning the cross-section and the design, as well as the installation situation and the ventilation conditions must be observed.
- The materials used may be subject to external influences (temperature, pressure, construction fastening, effect of chemical substances, etc.), which cannot be simulated in laboratory tests or field trials. In case of doubt, we definitely recommend that you carry out a test. This information does not imply any legal entitlement. Belimo will not be held liable and will provide no warranty.
- If cables which are not authorised for UL (NEMA) Type 4X applications are used, then flexible metallic cable conduits or suitable threaded cable conduits of equal value are to be used.
- The two switches integrated in the actuator are to be operated either on mains voltage or on safety extra-low voltage. The combination mains voltage/safety extra-low voltage is not permitted.

Product features

Fields of application	The actuator is particularly suitable for utilisation in outdoor applications and is protected against the following weather conditions: <ul style="list-style-type: none"> - UV radiation - Dirt / Dust - Rain / Snow - Air humidity
Operating mode	The actuator is equipped with a universal power supply module that can utilise supply voltages of AC 24...240 V and DC 24...125V. The actuator moves the damper to the desired operating position at the same time as the integrated capacitors are charged. Interrupting the supply voltage causes the damper to be rotated back into the fail-safe position by means of stored electrical energy. Conventional operation: The actuator is connected with a standard control signal of 0...10 V and drives to the position defined by the control signal. Measuring voltage U serves for the electrical display of the damper position 0...100% and as a control signal for other actuators. Operation on Bus: The actuator is fitted with an integrated interface for BACnet MS/TP, Modbus RTU and MP-Bus. It receives the digital control signal from the control system and returns the current status.

Pre-charging time (start up)

The capacitor actuators require a pre-charging time. This time is used for charging the capacitors up to a usable voltage level. This ensures that, in the event of a power failure, the actuator can move at any time from its current position into the preset fail-safe position.

The duration of the pre-charging time depends mainly on following factors:

- Duration of the power failure
- PF delay time (bridging time)

Typical pre-charging time

[d] = Power failure in days
 [s] = Pre-charging time in seconds
 PF[s] = Bridging time

Calculation example: Given a power failure of 3 days and a bridging time (PF) set at 5 s, the actuator requires a pre-charging time of 14 s after the power has been reconnected (see graphic).

PF [s]	[d]				
	0	1	2	7	≥10
0	5	8	10	15	19
2	6	9	11	16	20
5	8	11	13	18	22
10	12	15	17	22	26
	[s]				

Delivery condition (capacitors)

The actuator is completely discharged after delivery from the factory, which is why the actuator requires approximately 20 s pre-charging time before initial commissioning in order to bring the capacitors up to the required voltage level.

Bridging time

Power failures can be bridged up to a maximum of 10 s. In the event of a power failure, the actuator will remain stationary in accordance with the set bridging time. If the power failure is greater than the set bridging time, then the actuator will move into the selected fail-safe position. The pre-programmed bridging time is set to 2 s. This can be modified on site in operation with the use of the "Belimo Assistant App".

Setting fail-safe position (POP)

The desired fail-safe position can be set 0...100% with the "Belimo Assistant App" or ZTH EU. In the event of a power failure, the actuator will move into the selected fail-safe position, taking into account the bridging time which was set.

Converter for sensors

Connection option for two sensors (passive, active or switching contacts). In this way, the analogue sensor signal can be easily digitised and transferred to the bus systems BACnet or Modbus.

Parametrisable actuators

The factory settings cover the most common applications. Belimo Assistant 2 is required for parametrisation via Near Field Communication (NFC) and simplifies commissioning. Moreover, Belimo Assistant 2 provides a variety of diagnostic options. The ZTH EU service tool provides a selection of both diagnostic and setting options.

Product features

Combination analogue - communicative (hybrid mode)	With conventional control by means of an analogue control signal, BACnet or Modbus can be used for the communicative position feedback
Simple direct mounting	Simple direct mounting on the damper shaft with form fit insert.
Manual override	The damper can be manually operated using a hand crank. Unlocking is carried out manually by removing the hand crank.
High functional reliability	The actuator is overload protected, requires no limit switches and automatically stops when the end stop is reached.
Flexible signalling	The actuator has one auxiliary switch with a fixed setting (10°) and one adjustable auxiliary switch (0...90°).

Accessories

Tools	Description	Type
	Service tool for wired and wireless setup, on-site operation, and troubleshooting.	Belimo Assistant 2
	Converter Bluetooth / NFC	ZIP-BT-NFC
	Service tool, with ZIP-USB function, for parametrisable and communicative Belimo actuators, VAV controller and HVAC performance devices	ZTH EU
	Connecting cable 5 m, A: RJ11 6/4 ZTH EU, B: 6-pin for connection to service socket	ZK1-GEN
Electrical accessories	Description	Type
	Signal converter voltage/current 100 kΩ 4...20 mA, Supply AC/DC 24 V	Z-UIC
Gateways	Description	Type
	Gateway MP to BACnet MS/TP	UK24BAC
	Gateway MP to Modbus RTU	UK24MOD
Mechanical accessories	Description	Type
	RetroFIT+ adapter kit, F07/F10 (incl. screws F07), flat head/square, SW 17	ZPR05
	RetroFIT+ adapter kit, F07/F10 (incl. screws F07), square 45° offset, SW 14	ZPR06
	Adapter kit with spacer ring, F07, square 45° offset, SW 17	ZPR08
	RetroFIT+ adapter kit, F07/F05/F10 (incl. screws F07), flat head/square, SW 14	ZPR09
	RetroFIT+ adapter kit, F05/F07/F10 (incl. screws F05), flat head/square, SW 14	ZPR10
	RetroFIT+ adapter kit, F07/F10 (incl. screws F07), square 45° offset, SW 18	ZPR11
	RetroFIT+ adapter kit, F07/F10 (incl. screws F07), flat head/square, SW 16	ZPR12
	Hand crank for PR/PM actuator	ZPR20
Sensors	Description	Type
	Duct/Immersion sensor Temperature 150 mm x 6 mm Pt1000	01DT-1BN
	Duct/Immersion sensor Temperature 150 mm x 6 mm Ni1000	01DT-1CN
	Duct/Immersion sensor Temperature 200 mm x 6 mm Pt1000	01DT-1BP
	Duct/Immersion sensor Temperature 200 mm x 6 mm Ni1000	01DT-1CP
	Duct/Immersion sensor Temperature 300 mm x 6 mm Pt1000	01DT-1BR
	Duct/Immersion sensor Temperature 300 mm x 6 mm Ni1000	01DT-1CR
	Duct/Immersion sensor Temperature 450 mm x 6 mm Pt1000	01DT-1BT
	Duct/Immersion sensor Temperature 450 mm x 6 mm Ni1000	01DT-1CT
	Duct sensor Humidity / Temperature active 140 mm x 19.5 mm	22DTH-11M
	Outdoor sensor with weather shield Humidity / Temperature	22UTH-11
	Differential pressure sensor Air -150...250 Pa, LCD	22ADP-18QB

Electrical installation

Caution: Mains voltage!

Parallel connection of other actuators possible. Observe the performance data.

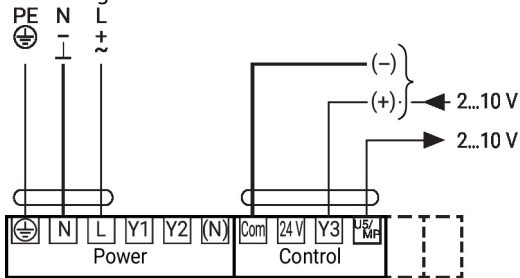

The wiring of the line for BACnet MS/TP / Modbus RTU is to be carried out in accordance with applicable RS-485 regulations.

AC 24...240 V / DC 24...125 V

Power supply must not be connected to the signal terminals!

Modulating control

Parallel circuit 4...20 mA

Setpoint 2...10 V

Electrical installation

Auxiliary switch

230 V + 230 V
24 V ✓+ 24 V

~~230 V + 24 V~~
~~24 V + 230 V~~

Further electrical installations

Functions with specific parameters (Parametrisation necessary)

Control 4...20 mA

Positioner SG..

Note

Maximum output power «DC 24 V out» 1.2 W @ 50 mA!
A separate isolating transformer must be used for higher performance!

Functions with specific parameters (NFC)

Control open/close

Functions with specific parameters (NFC)

Control 3-point

Connection on the MP-Bus

MP-Bus Network topology

There are no restrictions for the network topology (star, ring, tree or mixed forms are permitted).
Supply and communication in one and the same 3-wire cable

- no shielding or twisting necessary
- no terminating resistors required

Connection BACnet MS/TP / Modbus RTU

Connection BACnet MS/TP / Modbus RTU with analogue setpoint (hybrid mode)

Connection of passive sensors (BACnet MS/TP / Modbus RTU)

1) Resistance range
2) Tolerance measured value
Compensation of the measured value is recommended
- Suitable for Ni1000 and Pt1000
- Suitable Belimo types 01DT-..

Further electrical installations

Functions with specific parameters (NFC)

Connection of active sensors (BACnet MS/TP / Modbus RTU)

Possible input voltage range:

0...10 V

Resolution 5 mV

To capture for example:

- Active temperature sensors
- Flow sensors
- Pressure / differential pressure sensors

Switching contact connection (BACnet MS/TP / Modbus RTU)

Switching contact requirements:

The switching contact must be able to switch a current of 16 mA at 24 V accurately.

To capture for example:

- Flow monitors
- Operation / malfunction messages of chillers

Operating controls and indicators

5 Push-button and LED display green

- Off: No power supply or malfunction
- On: In operation
- Press button: Triggers test run, followed by standard mode

6 Push-button and LED display yellow

- Off: Standard mode
- On: Test run active
- Flickering: BACnet / Modbus communication active
- Flashing: Request for addressing from MP client
- Press button: Confirmation of the MP addressing

Auxiliary switch settings

! Note: Perform settings on the actuator only in deenergised state.

For the auxiliary switch position settings, carry out points **1** to **4** successively.

1 Gear train disengagement

Opening the manual override cover and adjusting the hand crank. Manual override is possible.

2 Manual override

Turn the hand crank until the desired switching position **A** is indicated and then remove the hand crank.

3 Auxiliary switch

For the auxiliary switch position settings, carry out points **1** to **4** successively. Opening the auxiliary switch adjustment cover and adjusting the hand crank. Turn the hand crank until the arrow points to the vertical line.

4 Terminals

Connect continuity tester to S4 + S5 or to S4 + S6. If the auxiliary switch should switch in the opposite direction, rotate the hand crank by 180°.

Service

Rotary actuator fail-safe, modulating, communicative, hybrid, AC 24...240 V / DC 24...125 V, 160 Nm, Running time motor 35 s

Service

Wireless connection Belimo devices marked with the NFC logo can be operated with Belimo Assistant 2.

Requirement:

- NFC- or Bluetooth-capable smartphone
- Belimo Assistant 2 (Google Play and Apple AppStore)

Align NFC-capable smartphone on the device so that both NFC antennas are superposed.

Connect Bluetooth-enabled smartphone via the Bluetooth-to-NFC converter ZIP-BT-NFC to the device. Technical data and operating instructions are shown in the ZIP-BT-NFC data sheet.

Wired connection The actuator can be parametrised by the ZTH EU via the service socket.
