

Customizable Non Fail-Safe multifunction technology actuator for controlling dampers in typical commercial HVAC applications.

- Torque motor 180 in-lb [20 Nm]
- Nominal voltage AC/DC 24 V
- Control MFT/programmable
- Position feedback 2...10 V

AMCX24-MFT

Functional data Torque motor 180 in-lb [20 Nm]	
Operating range Y 210 V	
Operating range Y note $420 \text{ mA w}/\text{ZG-R01}$ (500 Ω , 1/4 W re	sistor)
Input impedance 100 kΩ for 210 V (0.1 mA), 500 Ω fo mA, 1500 Ω for PWM, On/Off and Flo	
Operating range Y variableStart point 0.530 VEnd point 2.532 V	
Operating modes optional variable (VDC, PWM, on/off, floating	point)
Position feedback U 210 V	
Position feedback U note Max. 0.5 mA	
Position feedback U variable VDC variable	
Direction of motion motor selectable with switch 0/1	
Manual override external push button	
Angle of rotation Max. 95°	
Angle of rotation note adjustable with mechanical stop	
Running Time (Motor) 35 s / 90°	
Running time motor variable 35120 s	
Noise level, motor 45 dB(A)	
Position indication Mechanical, 3065 mm stroke	
Safety data Power source UL Class 2 Supply	
Degree of protection IEC/EN IP54	
Degree of protection NEMA/UL NEMA 2	
Enclosure UL Enclosure Type 2	
Agency Listing cULus acc. to UL60730-1A/-2-14, CAN E60730-1:02	
CE acc. to 2014/30/EU and 2014/35/E	U
Quality Standard ISO 9001	
UL 2043 Compliant Suitable for use in air plenums per Se 300.22(C) of the NEC and Section 602 IMC	

Technical data sheet

Safety data	Ambient humidity	Max. 95% RH, non-condensing
	Ambient temperature	-22122°F [-3050°C]
	Storage temperature	-40176°F [-4080°C]
	Servicing	maintenance-free
Weight	Weight	1.5 lb [0.68 kg]
Materials	Housing material	UL94-5VA

Product features

Application	For proportional modulation of dampers in HVAC systems. Actuator sizing should be done in accordance with the damper manufacturer's specifications. The actuator is mounted directly to a damper shaft up to 1.05" in diameter by means of its universal clamp. A crank arm and several mounting brackets are available for applications where the actuator cannot be direct coupled to the damper shaft. The default parameters for 210 V applications of theMFT actuator are assigned during manufacturing. If necessary, custom versions of the actuators can be ordered. The parameters can be changed by two means: pre-set and custom configurations from Belimo or on-site configurations using the Belimo PC-Tool software.
Operation	The actuator is not provided with and does not require any limit switches, but is electronically protected against overload. The anti-rotation strap supplied with the actuator will prevent lateral movement.
	The AMX series provides 95° of rotation and a visual indicator indicates position of the actuator. When reaching the damper or actuator end position, the actuator automatically stops. The gears can be manually disengaged with a button on the actuator cover.
	The AMCX24-MFT actuators use a brushless DC motor, which is controlled by an Application Specific Integrated Circuit (ASIC). The ASIC monitors and controls the actuator's rotation and provides a digital rotation sensing (DRS) function to prevent damage to the actuator in a stall condition. Power consumption is reduced in holding mode.
	Add-on auxiliary switches or feedback potentiometers are easily fastened directly onto the actuator body for signaling and switching functions.
Typical specification	Modulating control damper actuators shall be electronic direct coupled type, which require no crank arm and linkage and be capable of direct mounting to a shaft up to 1.05" diameter. Actuators must provide modulating damper control in response to a 2 to 10 VDC or, with the addition of a 500 Ω resistor, a 4 to 20 mA control input from an electronic controller or positioner. Actuators shall have brushless DC motor technology and be protected from overload at all angles of rotation. Actuators shall have reversing switch and manual override on the cover. Run time shall be constant and independent of torque. Actuators shall be cULus listed, have a 5-year warranty, and be manufactured under ISO 9001 International Quality Control Standards. Actuators shall be as manufactured by Belimo.

Accessories

Electrical accessories	Description	Туре
	Battery backup system, for non-spring return models	NSV24 US
	Battery, 12 V, 1.2 Ah (two required)	NSV-BAT
	Auxiliary switch 2 x SPDT add-on	S2A
	Service Tool, with ZIP-USB function, for programmable and	ZTH US
	communicative Belimo actuators, VAV controller and HVAC performance
