

## **Technical data sheet**

# G215S-J

#### **NPT-Threaded Globe Valves**

- chilled or hot water, up to 60% glycol, steam
- ANSI Class 250, up to 400 psi below 150°F
- repack kits available
- ANSI Class VI

### Type overview

| DN |

### **Technical data**

| Functional data    | Valve size [mm]                       | 0.5" [15]                                     |
|--------------------|---------------------------------------|---|
|                    | Fluid                                 | chilled or hot water, up to 60% glycol, steam |
|                    | Fluid Temp Range (water)              | 20338°F [-7170°C]                             |
|                    | Fluid Temp Range (steam)              | 32338°F [0170°C]                              |
|                    | Body Pressure Rating                  | ANSI Class 250, up to 400 psi below 150°F     |
|                    | Flow characteristic                   | modified equal percentage                     |
|                    | Leakage rate                          | ANSI Class VI                                 |
|                    | Pipe connection                       | Internal thread<br>NPT (female)               |
|                    | Servicing                             | repack kits available                         |
|                    | Rangeability Sv                       | 100:1   |
|                    | Maximum differential pressure (water) | 50 psi [345 kPa]                              |
|                    | Max Differential Pressure (Steam)     | 50 psi [345 kPa]                              |
|                    | Flow Pattern                          | 2-way   |
|                    | Controllable flow range               | stem up - open A – AB                         |
|                    | Cv                                    | 4.4   |
|                    | Maximum Inlet Pressure (Steam)        | 100 psi [690 kPa]                             |
| Materials          | Valve body                            | Bronze  |
|                    | Valve plug                            | Stainless steel AISI 316                      |
|                    | Stem                                  | 316 stainless steel                           |
|                    | Stem seal                             | EPDM O-ring                                   |
|                    | Seat                                  | Stainless steel AISI 316                      |
| Suitable actuators | Non Fail-Safe                         | LVB(X)  |
|                    | Spring                                | LF  |
|                    | Electrical fail-safe                  | LVKB(X)                                       |

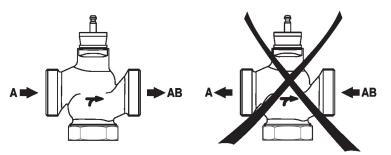

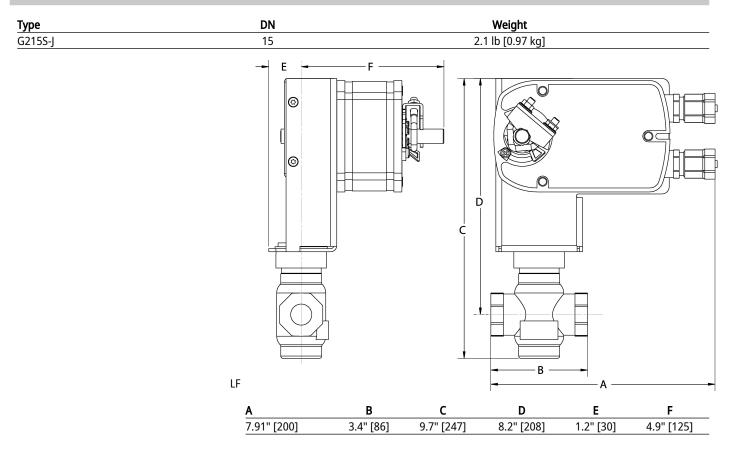

- WARNING: This product can expose you to lead which is known to the State of California to cause cancer and reproductive harm. For more information go to www.p65warnings.ca.gov
- The valve has been designed for use in stationary heating, ventilation and air-conditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- Only authorized specialists may carry out installation. All applicable legal or institutional installation regulations must be complied with during installation.
- The valve does not contain any parts that can be replaced or repaired by the user.
- When determining the flow rate characteristic of controlled devices, the recognised directives must be observed.

#### Installation notes

**Flow direction** The direction of flow, specified by an arrow on the housing, is to be complied with, since otherwise the valve could become damaged.
