For maintenance work, the correct valve position must be set via the control signal. Additionally, the actuator must be disconnected from the power source. The hand crank and manual override shall not be used as a safety measure to maintain the valve position.

Product features			
Applie	cation	PR Series valve actuators are designed with an integrate indicators. For outdoor applications, the installed valve or above horizontal. For indoor applications the actuato directly under the valve.	must be mounted with the actuator at
Operation	The PR series actuator provides 90° of rotation and a vis valve. The PR Series actuator uses a low power consump electronically protected against overload. A universal po supply voltage in the range of AC 24240 V and DC 24 thermostat to eliminate condensation. Two auxiliary sw open and the other is field adjustable. Running time is f by using the Near Field Communication (NFC) app and a	ption brushless DC motor and is ower supply is furnished to connect 125 V. Included is a smart heater with ritches are provided; one set at 10° field adjustable from 30120 seconds
